

*The Evening CME conducted by Teleradiology Solutions and supported by the Telerad Foundation, at the RadGurukul auditorium was exceptionally well received with more than 45 attendees from across the city. Our visiting faculty Dr Wable conducted two comprehensive interactive sessions covering MRI of the upper extremity and lower extremity respectively. Dr Wable showed some common as well as some highly unusual MSK pathologies and had the audience riveted throughout. The sessions were highly interactive with keen audience participation. Between the two sessions interesting MSK cases from TRS were presented by Dr Seetharamu.*
