

The Telerad Foundation (supported by Teleradiology Solutions) is delighted to bring you a stimulating online educational curriculum 'Weekly E-Classes' in Radiology.

We will be covering the gamut of Diagnostic Radiology topics with a regular online e-class every Wednesday evening. We started this initiative on the 3rd of April and have had more than 45 registrations in the first 2 months

These sessions are hosted on our comprehensive yet user friendly online radiology portal. You may view some of our previous E-Lectures on our teaching website (<http://www.radguru.net/Web/RadguruVideo.aspx>) to get an idea of the e-class experience. This is further enhanced and made interactive with Q&A via chat.

In short, you will have the experience and pleasure of attending a live lecture in diagnostic radiology by one of our distinguished panel of speakers, while sitting in the comfort of your home or department.
