

An exciting day-long CME was conducted by Teleradiology Solutions and supported by Telerad Foundation on the subject of **Emergency Radiology**, with an enthusiastic response from radiologists in Bangalore and around. This is a growing and evolving field and we are in an position to see a unique spectrum of disease, given that we report emergent scans for hospitals in 20 countries around the world. The topics covered ranged from biliary to obstetric to pulmonary to cardiovascular to neurologic, all with an emergency focus. Spreading our learning in emergency radiology is important for us as this is a field where medical science and technology converge to make a significant positive impact on patient care in acute life threatening disease.

The CME was well received with rigorous interaction and an overwhelming feedback from the delegates. Below are a few pictures to give you a glimpse of the event.
